

Winner of the 17th Annual National Indie Excellence® Award for Science Fiction and IPPY's 2023 Silver Medal in Urban Fiction, *Edison in the Hood* is a genre-twisting, sci-fi novel from debut author Nadia Uddin. Nadia is available for interviews, readings and features. We're excited for the opportunity to bring this new title to your attention and share it with your readers.

About *Edison in the Hood*:

When Aisha Malik's mother died, she took a secret with her—one that destroyed her relationship with Aisha's brother, Sam. But what if Aisha could revive her mother's brain just long enough to reenact their last conversation and discover the truth?

Aisha is an ambitious PR executive with a forte for making complex and controversial topics accessible to the masses. Her brother, Sam, is a despondent genius who loves to fight everyone and everything in the name of justice, hopping from one political fight to another and hiding a mental illness that causes him shame. When the opportunity arises for Aisha to work with brilliant scientist and leading futurist Jay Edison at his Brain Reinvigoration Project, she begins obsessing over artificial intelligence and its potential to revive her mother's brain. She begs Sam to participate, unaware that he has begun working with groups that have very different visions for the future of artificial intelligence. The siblings set out to

define the role that technology should play in society, asking themselves, "Artificial intelligence may solve the world's biggest problems, but can it fix our most challenging relationships?"

Edison in the Hood is a stunning and provocative debut that explores what it truly means to be human and possess free will in a culture gripped by automation. As Aisha and Sam grieve their mother's passing, they delve into the complex morals of scientific advancement, revealing how technology plays a part in relationships—with both the living and the dead.

Advance Praise:

"Uddin's rich world building skillfully portrays the novel's dichotomy: technology has made life easier and more beautiful, but those who can't access it are left stranded, and the gap between the haves and have-nots is stark." —**BookLife at Publisher's Weekly**

"This is not a hard science-fiction book, nor is it strictly a literary novel about relationships. It is both; somehow Uddin has combined the two in a way that works and is accessible to fans of both genres." - **The Daily Voice**

"I was swept up by Uddin's nuanced and witty depiction of artificial intelligence alongside human emotion. Propulsive, thought-provoking, and tender, Edison in the Hood is a beautiful debut." -- **Lily Brooks-Dalton, author of Good Morning, Midnight**

"Uddin takes us on a wild ride through the worlds of the mind, memory preservation, and love between siblings. Brilliant and unique, this genre-bending book is both profound and exciting." —**Taylor Larsen, author of Stranger, Father, Beloved**

"A deft and brilliantly original debut in which deep emotional intelligence and bold imagination combine to thrilling effect." —**Hermione Hoby, author of Virtue**

"A promising speculative debut that doesn't feel as if it rolled off the usual robotics assembly line." —**Kirkus Review**

"Nadia Uddin's Edison in the Hood is the work of a writer with both a big mind and a big heart. Uddin's exploration of science, technology, and the moral questions that arise from advancements touted as life-enhancing is fascinating and engaging. She explores family dynamics, mental illness, and the complexities of a society that values innovation at any cost with great sensitivity and intelligence. This is an exciting and memorable debut." —**Christine Sneed, bestselling author of Little Known Facts and Please Be Advised: A Novel in Memos**

A fascinating, fun, and profound exploration of the near future, Nadia Uddin's Edison in the Hood delves into the big questions: AI, nanotechnology and what constitutes love. --**Elizabeth Gaffney, author of Metropolis**

About Nadia Uddin:

Winner of the 17th Annual National Indie Excellence® Award for Science Fiction, IPPY's 2023 Silver Medal in Urban Fiction, and Slice's 2019 Bridging the Gap Award, Nadia is a graduate of Yale Writers' Workshop and has studied alongside esteemed writers through The Center of Fiction, Catapult and A Public Space. *Edison in the Hood* is her debut novel.
